Summary

Passionate software engineer who loves to code and is always learning, turning ideas into production-ready products from initial build through launch and continuous improvement. Experienced across web, mobile, and full-stack development, with a consistent focus on performance and optimization, and on crafting thoughtful, polished UIs that are continually refined for a better user experience. Comfortable building from scratch and shipping to production, while continually sharpening system design skills to keep products fast, scalable, and maintainable.

Technical Skills

Languages: JavaScript, HTML5, CSS3, Python, Java, C, C++, SQL
Frontend: React.js, Redux, Tailwind CSS, Eleventy (SSG), Responsive Design, Vite
Mobile: React Native, Flutter, Android, iOS
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MySQL, Firebase, Appwrite
Tools: Git, Power BI, Vercel, Netlify

Experience

Software Engineer Jun 2025 – Present
InnovationM Mobile and Web Technologies *Noida, India*

- Developed the company's main website from scratch using **HTML, CSS, and JavaScript** with **Static Site Generation (SSG)** via **Eleventy**, optimizing for faster load times while delivering a **responsive** layout and improved **UI/UX**.
- Contributed to the frontend of **FoxmatrixAI**, an AI-powered hiring platform for candidate testing and shortlisting, built with **React.js**.
- Built the **ISB Learning App**, the official learning platform of the **Indian School of Business (ISB)**, from scratch as a core member of the team and drove it to release on the **App Store** and **Google Play**. Developed in **React Native** from a **single codebase** supporting **web, Android, and iOS**, and continue to ship new features, performance optimizations, and bug fixes post-release.

Technology Intern Apr 2024 – Jun 2024
Science and Technology Vertical, NITI Aayog *New Delhi, India*

- Designed and built a multi-page **Power BI dashboard** covering 10 economic metrics for all Indian states and UTs (2011–2022), segmented by region and benchmarked against national trends to support the **NITI States Initiative**.
- Authored a policy booklet on AI and cybersecurity (*Securing Tomorrow*) for the **NITI States Workshop**, included in the official starter kit for dignitaries.
- Analyzed national programs such as the **Production Linked Incentive** scheme, assessing industrial outcomes for strategic research.

Frontend Development Intern Aug 2022 – Sep 2022
Delta Edge Technology Ventures *New Delhi, India*

- Built and optimized core screens (homepage, deal listings) for the **DealDog** app in **React Native**, improving page load time by ∼**35%**.
- Created a filter-rich **search UI** with category, discount, and price-range options, increasing test-user engagement by ∼**25%**.
- Redesigned app navigation with a hybrid **tab + drawer** pattern, cutting average task completion time by ∼**30%** in user testing.

Projects

Pikatube | *React.js, Redux, Node.js, Express, MongoDB* | Live Demo

- Built a full-stack video-sharing platform on the **MERN stack** with **JWT authentication**, MongoDB-backed video management, and a responsive UI.
- Implemented search by title, description, and tags, along with likes, comments, and sharing features.

Mitraz | *React (Vite), Tailwind CSS, Appwrite* | Live Demo

- Built a Pinterest-style media-sharing platform with **infinite scroll** and a responsive UI.
- Implemented authentication, content management, and social features using **Appwrite**.

Education

Bhagwan Parshuram Institute of Technology New Delhi, India
Bachelor of Technology in Computer Science *Aug 2020 – May 2024*
